### Key Features

#### Comprehensive Farm Management Functions

Hi-FMS provides complete management modules covering all aspects of modern farming: farm, field, vehicle, equipment, task, material, and personnel management. Simplify your daily operations and make data-driven decisions with ease.

#### Real-Time Progress Viewing

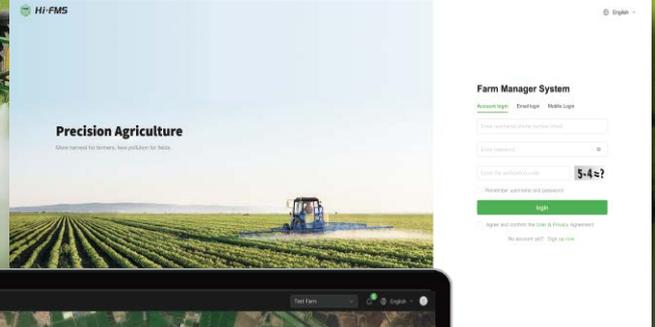

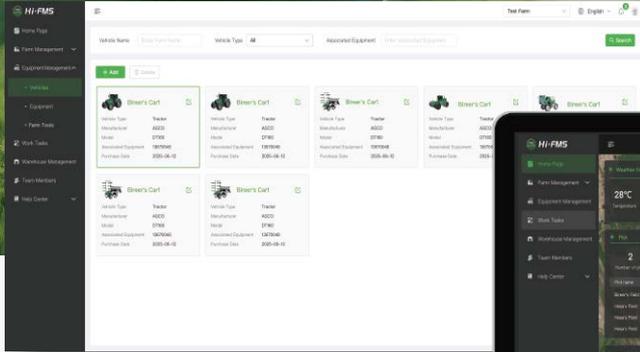

Stay informed at every step. Hi-FMS supports real-time data upload, including operation trajectories and completion status, enabling users to monitor work progress and performance instantly.

#### Prescription Map Support

Optimize input use with precision. Hi-FMS supports prescription map operations through ISOBUS TC-GEO, allowing you to import and assign prescription-based tasks, monitor completion, and seamlessly upload or export prescription data.

# Hi-FMS

## Multiple Operation Task Types

Handle diverse agricultural activities efficiently. Hi-FMS supports a range of operation types — including tillage, seeding, fertilization, and spraying — all integrated with ISOBUS and prescription map functionalities.

## Multi-Format Compatibility

Easily share and integrate data with global standards. Hi-FMS supports SHP, ISOXML, and other internationally recognized data formats for both import and export.

## User-Friendly Interface

Enjoy a seamless user experience with Hi-FMS's unified interface design and consistent data logic across all modules — ensuring clarity, efficiency, and ease of use for every operator.
